WORK EXPERIENCE

Senior Product Designer @ Momoux

10/2019-11/2020 ShenZhen

- Improved the end-to-end experience of ZhaoShangZhengQuan Platform by using **MVP** methods and conducting usability reviews, identifying UX issues, and proposing design recommendations for 14.79 million users.
- User-centered processes in design and team cooperation.
- Supported multiple dev teams for delivery.

UX/UI Designer @ Sennofit

08/2018-09/2019 ShenZhen

- Increased user satisfaction(+30%) and perceived findability of information(+10%) with redesigned Sennofit App

PROJECTS

Full-Stack - German Mindmap Dictionary, Responsive Web App (Independent) Jan 2023 - Present

- Deployed website for learning German words more easily and effectively using **React**, **NodeJS** and Mindmaps.
- Displayed front-end mindmap interface by using the **markmap lib**.
- Defined problem, completed design exploration and generated Wireframe through user research, competitor analysis and other **UX** methods.
- Converted HTML results from the wiki api into JSON format via using **Cheerio library**.
- Used **Tailwind** for styling and **Ant-design** UI component to save development time.
- Implemented the RESTful APIs with **express** to handle HTTP requests and responses.
- Implemented the backend server which supports user authentication and data storage for each user using Node.js and **MongoDB**, deployed on **Cyclic**.
- Supported user to Add, Read, Update and Delete (**CRUD**) their own notes for dictionary words.
- Analyzed user data using **Google Analytics** (react-ga4).
- Awarded the best graduation project.

Full-Stack - PokeFight, Web game (Group)

12/ 2022

- Developed the front-end part of a three-person team project, using **React**, **React-Router**, **Tailwind**.
- Integrated an external API into the App to get all Pokemon images.
- Implemented the core attacking algorithms, fight history information and game interface.

Shopping Cart, responsive Web app (Independent)

Jan 2023

- Developed fully functional shopping cart using React, **Vite**, **TypeScript** and **Bootstrap**.
- Used **React Context** to manage user state and **LocalStorage** to store the user's data.
- Enabled users to add, increase, decrease, delete products to Shopping Cart.
